Pancham Plasto Chem

Since 2009

Create Success With Colours.....

Masterbatches and polymer compounding

About us

Established in 2009, as a visionary small-scale enterprise, Pancham Plasto Chem has grown into one of the most trusted and reputable manufacturers and suppliers in the polymer compounding and masterbatch industry. Over more than a decade of technical innovation, consistent quality control and customer-centric service, we have earned a distinguished market reputation. We are specialized in color, additive masterbatches and compounding as well as customized plastic solutions.

Our Philosophy

"Nothing, absolutely nothing, sells like quality."

Our success lies in the close relationship with each customer, in the collaborative development of differentiated solutions, and in our superior technological results. Our success is reinforced every day, with each suitable and correct product we provide to our valued customer, that meets and exceeds their expectations.

Our Comprehensive Product Range

1

Colour Masterbatches

Custom-formulated shades engineered with precision spectrophotometric matching. Designed for vibrant aesthetics, thermal stability and non-bleeding performance across injection, blow molding and extrusion.

2

White Masterbatches

High-loading Titanium Dioxide (TiO2) formulations providing superior opacity, whiteness index, UV stability and glossy surface finish.

3

Black Masterbatches

Formulated using premium carbon blacks to deliver jetness, high UV resistance, electrical conductivity properties (if required) and smooth dispersion.

4

Specialty Additive Masterbatches

Engineered to optimize manufacturing efficiency and end-product longevity:

- UV Stabilizers & Absorbers
- Slip & Anti-Block Agents
- Antioxidants & Thermal Stabilizers
- Optical Brighteners
- Processing Aids & Desiccant Masterbatches

5

Carrier Resin Capabilities

We engineer masterbatches compatible with a wide spectrum of commodity and engineering base resins:

- Polyolefins: Polypropylene (PP), Polyethylene (PE / HDPE / LDPE / LLDPE)
- Styrenics: Acrylonitrile Butadiene Styrene (ABS), High Impact Polystyrene (HIPS)
- Engineering Polymers: Polycarbonate (PC), Polyethylene Terephthalate (PET), Polybutylene Terephthalate (PBT)

Why Pancham Plasto Chem?

1 Decade of Proven Track Record

Established in 2009 with deep technical compounding expertise.

2 Flawless Dispersion

Ultra fine pigment and additive distribution ensuring zero nozzle clogging and consistent batch-to-batch shade matching.

3 Custom Formulations

In house color matching and technical support tailored to your exact processing parameters.

4 Stringent Quality Assurance

Rigorous testing for Melt Flow Index (MFI), ash content, dispersion and mechanical properties.

5 Dedicated Customer Support

“Building lasting relationships through continuous support 24x7, prompt responses, and reliable service — every day of the year.”

What you can make with us

Artificial grass mat with switches

Blow moulding bottles

PP Fiber

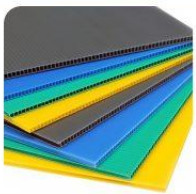

Woven Sacks

Household plastics

Pens

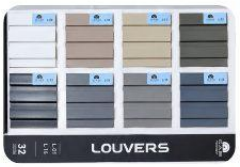

PP hollow sheets

Toys

Wall clocks

HIPS louvers

Let’s create success together
